EXECUTIVE SUMMARY

A highly motivated and dedicated final-semester Computer Science fresh graduate with practical experience in software development, testing, and academic projects. Possessing strong skills in web development, object-oriented programming, system administration, and IT infrastructure, along with a solid foundation in quality assurance and testing practices.

Recently qualified the National IT Skills Competency Test (HEC) with 61.4% Percentage, demonstrating a strong commitment to professional growth and technical excellence. Currently enrolled in a National Vocational & Technical Training Commission (NAVTTTC)-certified course: System Administration and IT Infrastructure, gaining hands-on experience under real-time industrial guidelines and environments.

A quick learner with a proactive attitude, eager to apply technical knowledge, enhance practical skills, and contribute effectively to entry-level roles in software development, QA, or IT support.

SKILLS

- Problem Solving & Analytical Thinking
- Software Testing & Quality Assurance (Test Case Design, Bug Reporting)
- System Administration & IT Infrastructure Management
- Operating Systems (Windows/Linux Basics)
- Database Basics (SQL)
- Software Project Management (SDLC, Agile)
- Version Control (Git – basic knowledge)
- Documentation & Technical Writing
- Teamwork & Collaboration
- Time Management

EDUCATION

2021 - 2026

Iqra University, Karachi

Bachelor of Science in Computer Science

Gained a strong foundation in computer science through programming, databases, and software engineering, with added skills in QA, testing, and team projects.

WORK EXPERIENCE

March 2024 - Sep 2024

SNJ Global Services

Programmer Intern

Developed and debugged code, collaborated with teams, and gained hands-on programming experience.

PROJECTS

AI-Based Desktop Assistant (DeskBot)

- Developed a voice-controlled assistant to automate desktop tasks
- Implemented basic AI and speech recognition for user commands

MITM Attack Simulation (Network Security Project)

- Simulated a Man-in-the-Middle attack using USB-based approach
- Analyzed network vulnerabilities using Banana Pi

React-Based Web Portal (User Authentication System)

- Built a web application with login/register functionality
- Implemented input validation and error handling using React

LEADERSHIP

Team Lead – Academic & Social Project (9 Members)

- Led a team in organizing community-based activities
- Conducted visits to orphanages and old age homes
- Arranged awareness sessions and managed an Iftar event

CERTIFICATIONS

- NAVTTC (In Progress) – **System Administration & IT Infrastructure**
- National IT Skills Competency Test (HEC) – **61.4%**
- API testing & basic Overview of JMeter – **10 Pearls University**
- Introduction to API Testing with Postman – **10 Pearls University**
